AutoViri™
IIoT Analytics

Real-time operational data visibility directly from your production floor that triggers actionable alerts.

AUTOVIRI

by Capstone Technologies

AutoViri IIoT Analytics equips your team to facilitate timely and informed decisions for optimal performance.

- Monitor machine, production and/or staff KPIs for volumes, velocity and variety
- Establish KPI target thresholds to identify problems, trends and outliers
- Trigger actionable alerts for underperforming KPIs
- Enhance predictability of SLA delays, labor and OT spend, and service/maintenance

How Does AutoViri IIoT Analytics Help You?

Production floor visibility when it's needed and for whom its needed, wherever they are located.

Gain Operational Insights and Enable Process Optimization

Real-time and/or historic data visualization delivered online or sent to your inbox helps identify and resolve issues. Users can segment analytics with pre-built filters to glean insights and share meaningful insights inside and outside your organization for making impactful decisions. With AutoViri IIoT Analytics, you can improve productivity, increase operational efficiency and maximize asset utilization to name a few. Gain insights via device-level, site-level and/or corporate-level dashboards.

## Monitor KPIs with a Comprehensive Dashboard

IIoT Analytics helps you keep a close eye on your operations with real-time visibility, even providing actionable alerts for underperforming KPIs most important to you, like:

- **Production volumes, velocity and variety**
- **Asset and labor availability, performance, and utilization**
- **Machine errors, efficiency and effectiveness**

Avoid Unplanned Disruptions

IIoT Analytics facilitates a better understanding of those unplanned events that can quickly impact your bottom line, like:

- **SLA delays**
- **Increased labor and/or overtime**
- **Service and maintenance**
- **Indirect costs**

Find Out How AutoViri IIoT Analytics Can Add Value to Your Operations

The experts at CapStone can help you find the best point in your production to implement IIoT Analytics, regardless of whether or not you have any CapStone solutions already in place.
