

AutoViri™ OptiSort Shelving

Tough, modular and ergonomic, AutoViri OptiSort Shelving was created with the unrelenting grind of the print-to-mail industry in mind. Unlike with shelving from home improvement stores, you can be confident you've invested in a fixture that's made to stand the test of time.

It's design is based on years of testing with the help of mailers across the print-to-mail industry. With OptiSort Shelving's configurable options, you can create a system that's exactly right for your facility, your setup, and your equipment.

Benefits

- Increases efficiency by separating and staging jobs.
- Provides quality control by aligning sorter bins/pockets with trays on shelves.
- Adds flexibility to any production workflow.
- Allows for multiple sort schemes.
- Lasts for years and can be added onto or changed as needed.

Features

- Fits mail trays and tubs (including EMM, MM, half-trays and flats mail).
- Built specifically for all major sorter manufacturers, aligning perfectly with sorter bins/pockets.
- Built to last and fully customizable, allowing you to choose the number of modules, the number of shelves per module, and whether the shelves are fixed or sliding.
- Designed to allow for gravity or powered take away conveyor to be mounted atop the shelving.
- Includes a tray tag holder for each tray position on each shelf.
- Available for purchase, finance or lease.
 - Available in single-directional or bi-directional options
 - Color options available
 - Bolt-together installation allows for easy expansion
 - Anchored to the floor for safety
 - Ergonomically designed
