

AutoViri™ Tray Management System

The AutoViri Tray Management System (TMS) isn't just a conveyor. It's an intelligent production system that automatically delivers trays and packages to the next step in your process. Besides eliminating labor-intensive material handling, it increases in-plant accuracy and efficiency with routing you control.

The AutoViri TMS is reliable and flexible. Used alone or with other automation, it's a perfect fit for your unique production configuration. It can replace or be used alongside any existing conveyor you have today.

Benefits

- Increases efficiency and throughput.
- Saves labor and eliminates duplication of efforts or looking for "lost" trays or packages.
- Rugged construction for years of tough use.
- Can be standalone for basic routing or provide the input/output for existing or new automated processes like robotics and other.

Features

- ⚙ In-line scanning and centralized HMI panel for complete controls and troubleshooting.
- ⚙ Designed by print, mail and packaging experts for print, mail and packaging operations.
- ⚙ Warranties, support and financing plans available.
- ⚙ Complete turnkey solution provided by CapStone Technologies.
